

THE FERTILITY SHIPPING SPECIALISTS YOU CAN TRUST

Cryoport Systems is the life science industry's most trusted provider of temperature-controlled supply chain solutions, serving fertility organizations around the world. Over the past two decades, Cryoport Systems has transported over 600,000 domestic and international shipments.

WHY CHOOSE CRYOPORT?

100% REQUALIFICATION

All shippers are requalified after each use for physical suitability, cleanliness, LN2 capacity, and minimum required hold times. Shippers are removed from our fleet if their specifications do not meet our internal standards.

POWERFUL INFORMATICS

The Smartpak™ condition monitoring system provides comprehensive tracking for each shipment. Detailed data such as location (GPS), temperature, pressure, light, orientation, humidity, and shock allow our customer support staff to intervene.

ROBUST EQUIPMENT

Our proprietary Cryoport Express® liquid nitrogen dry vapor shippers maintain cryogenic temperatures for up to 10 days.

END-TO-END SOLUTIONS

From point of origin to destination, we coordinate the pickup and shipping dates to align with scheduled procedures and lab staff availability. To guarantee seamless experience, our team also provides documentation assistance and dedicated customer support.

INSURANCE

We offer insurance options for the transportation of your patients' reproductive materials. The insurance coverage provides additional peace of mind, extra protection and a financial safety net for both the intended parents and for clinics.

VERI-CLEAN® - VALIDATED CLEANING

Our proprietary cleaning process for shippers and stainless-steel accessories utilizes a multi-purpose reagent effective against bacteria, fungi, and viruses. Veri-Clean® reduces external contaminants by 99.9999%
