

When you're aiming for best-in-breed,
**TRUST CRYOPORT SYSTEMS
TO ENABLE THE OUTCOME™**

Cryoport Systems enables the future of sustained animal health with our innovative technology and robust platform of global supply chain solutions.

We support the journeys of high-value, irreplaceable materials to over 150 countries and prioritize risk mitigation with near real-time traceability for every shipment. Cryoport Systems' equipment is rigorously tested to endure the risks associated with an unpredictable shipping environment. Additionally, our extensive inventory enables us to supplement fleets at times of high demand.

Our platform of supply chain solutions includes:

- An expansive fleet of cryogenic shipping systems
- Smartpak II® condition monitoring system
- Long and short-term sensitive material storage options
- Expert-backed logistics management solutions

When your shipments require the highest-quality temperature-controlled transport, trust Cryoport Systems to **Enable the Outcome™** and add certainty to every step of your material's journey.

Cryoport Systems' Services

- Temperature-controlled shipping, storage, and tracking
- Documentation assistance and dedicated customer support
- Consulting Services – shipping risk assessment, shipping lane validation, and more

What We Ship

- Semen, embryos, and oocytes
- Stem cells and regenerative therapies
- Vaccines & antibiotics
- Monoclonal antibodies & immunotherapies
- Regulated biological submissions
- Diagnostic & reference materials requiring chain of custody

ENABLING CERTAINTY FOR THE ANIMAL HEALTH INDUSTRY

End-to-End Solutions

From point of origin to destination, we provide easy storage, ordering, fulfillment, shipping, continuous monitoring, documentation assistance, and dedicated customer assistance.

Intelligent Logistics

Our condition monitoring system tracks key aspects of each shipment that could affect the quality or timing of delivery. Continuous monitoring tracks location (GPS), temperature, pressure, light, orientation, humidity, and shock.

Chain of Compliance®

Chain of Compliance® provides full traceability not only for commodity history of shipments but also for the historical use, performance, handling, requalification, cleaning, and disinfection of the equipment.

Veri-Clean® Validated Cleaning

The proprietary cleaning process for our shippers and stainless-steel accessories utilizes a multi-purpose reagent effective against bacteria and viruses. Veri-Clean® reduces external contaminants by 99.9999%.

Cryoport Systems is the comprehensive supply chain partner for the life sciences industry that excels in the specialized management of animal health materials through our comprehensive offerings in logistics, BioServices, and consulting. With our expansive platform of management solutions and decades of temperature-controlled supply chain expertise, Cryoport Systems helps **Enable the Outcome™** for animal health programs by supporting certainty throughout the supply chain—one patient, one therapy, one product at a time.

When your livelihood relies on the health of your animals,
