

# CRYOSHUTTLE®

## *World Class IVF Shipping Services*

### *Reliable Local Pickup & Delivery for Reproductive Materials*

Experience reliable local pickup and delivery of sensitive reproductive materials with Cryoport Systems' Cryoshuttle® service. Equipped with our industry-leading Chain of Compliance® processes, the Cryoshuttle® enables the expedited delivery of patient materials in a Cryoport Systems' shipper from our own fleet of shipping systems to clinics, laboratories, and hospitals at a cost-effective rate. The Cryoshuttle® provides seamless direct handling, continuous traceability, and sample integrity documentation throughout the entire journey.

Our world-class Cryoshuttle® service operates within a 100-mile radius of the following regions:

### *Sustained Transport Delivered Locally*

Cryoport Systems' team of trained drivers is prepped to transport sensitive reproductive materials according to clinic processes and industry compliance standards. Each Cryoshuttle® is equipped with GPS-tracked video surveillance, state-of-the-art routing software for the most optimal and efficient routes, and the ability to monitor driver motions and exterior conditions to minimize risk, shock, and orientation upsets. With improved handling, security, and traceability, clinics and prospective parents can experience peace of mind knowing their precious reproductive materials will maintain their integrity throughout the transport process.

### *Cryoshuttle® Key Features:*

- Cryoport Systems' team of qualified drivers is trained to handle specialized equipment according to clinic processes and standard industry requirements.
- Advanced vehicle routing software is utilized to determine the most optimal and efficient transit path.
- Our custom-built vehicles include enhanced features such as near real-time GPS fleet tracking and interior and exterior video surveillance.
- We can support regularly scheduled pickups and deliveries as well as rush orders for additional convenience.
- Cryoport Systems' end-to-end solutions reduce risk, shock, and orientation upsets by utilizing video surveillance of the commodities from point of origin to delivery.
- Our Cryoshuttle® service provides cost-effective, local transport as an alternative option to coordinating the intricacies of air shipment.

For certainty in transporting your most precious materials,  
**trust Cryoport Systems to Enable the Outcome.™**

Cryoport Systems is the comprehensive supply chain partner for the life sciences industry that excels in the specialized management of sensitive materials through our comprehensive offerings in logistics and consulting. With our expansive platform of management solutions and decades of temperature-controlled supply chain expertise, Cryoport Systems helps **Enable the Outcome™** for clinics and prospective parents by supporting certainty throughout the supply chain—one patient, one journey, one family at a time.
